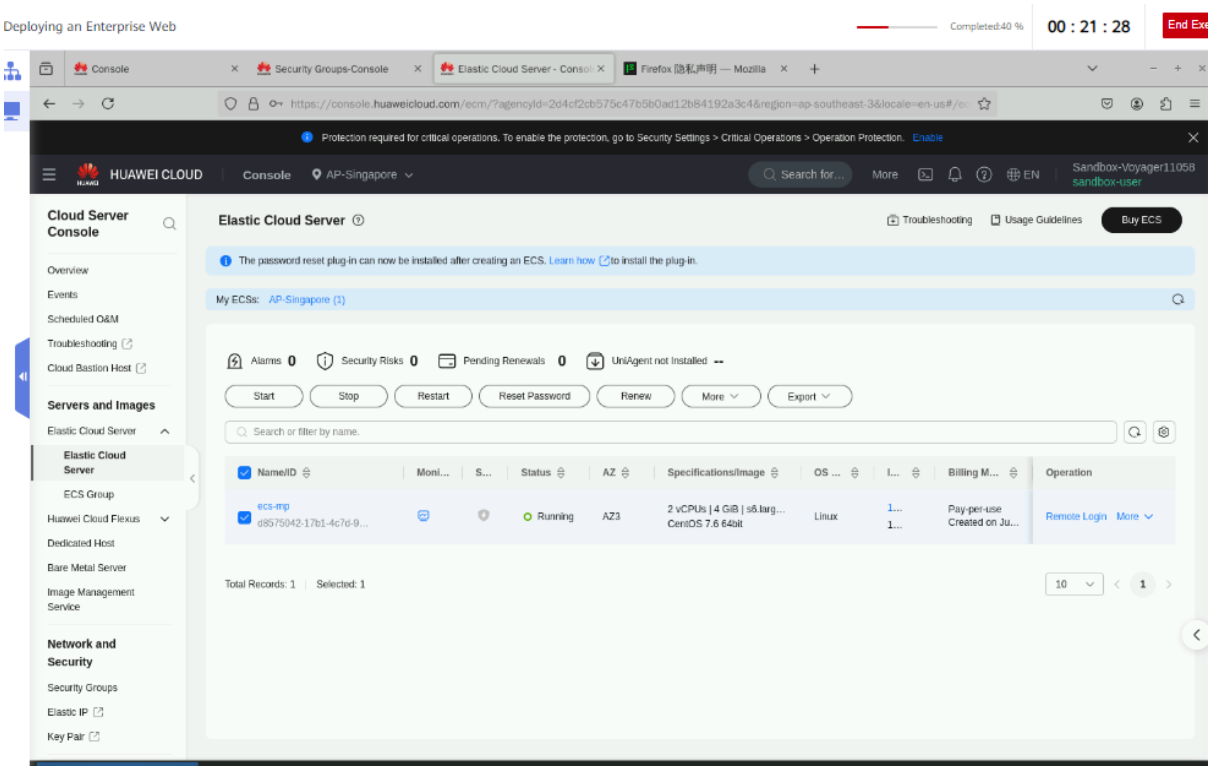
SYEDA AREESHA GILLANI

ASSIGNMENT

KICS UET LAHORE

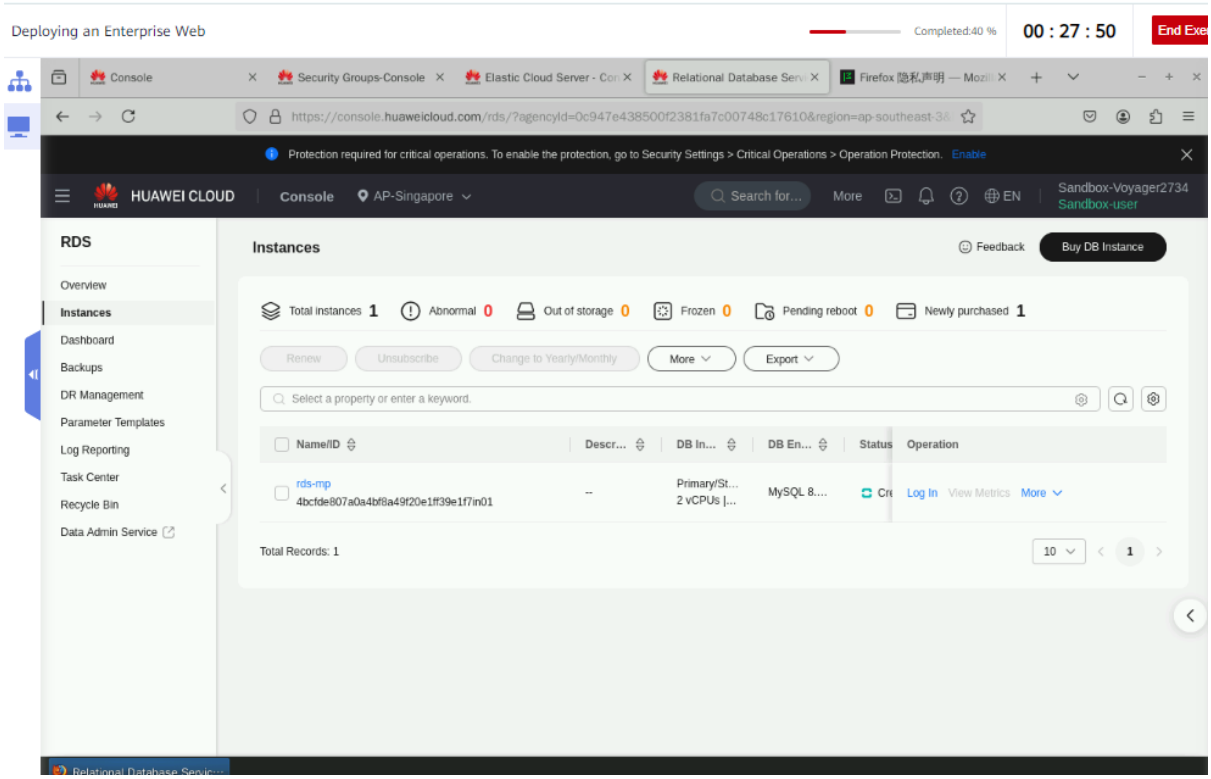
ECS Instance Created

This screenshot shows my ECS instance in Huawei Cloud after successful creation, with public EIP assigned and status as 'Running'.



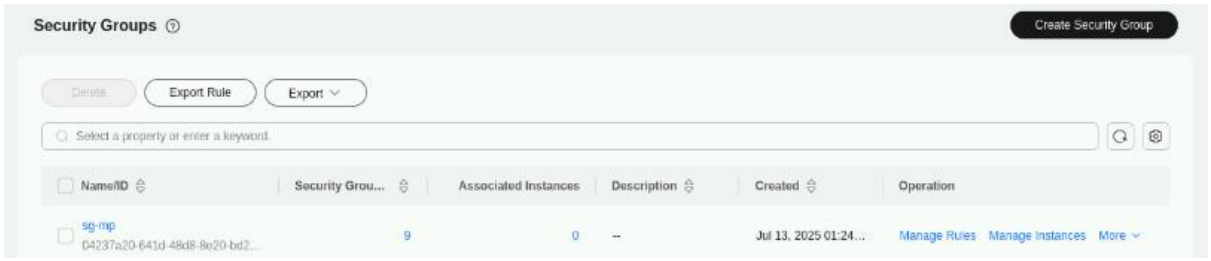
RDS Instance Created

This shows the RDS MySQL instance configured with database `wordpress`, connected to the same VPC as ECS.



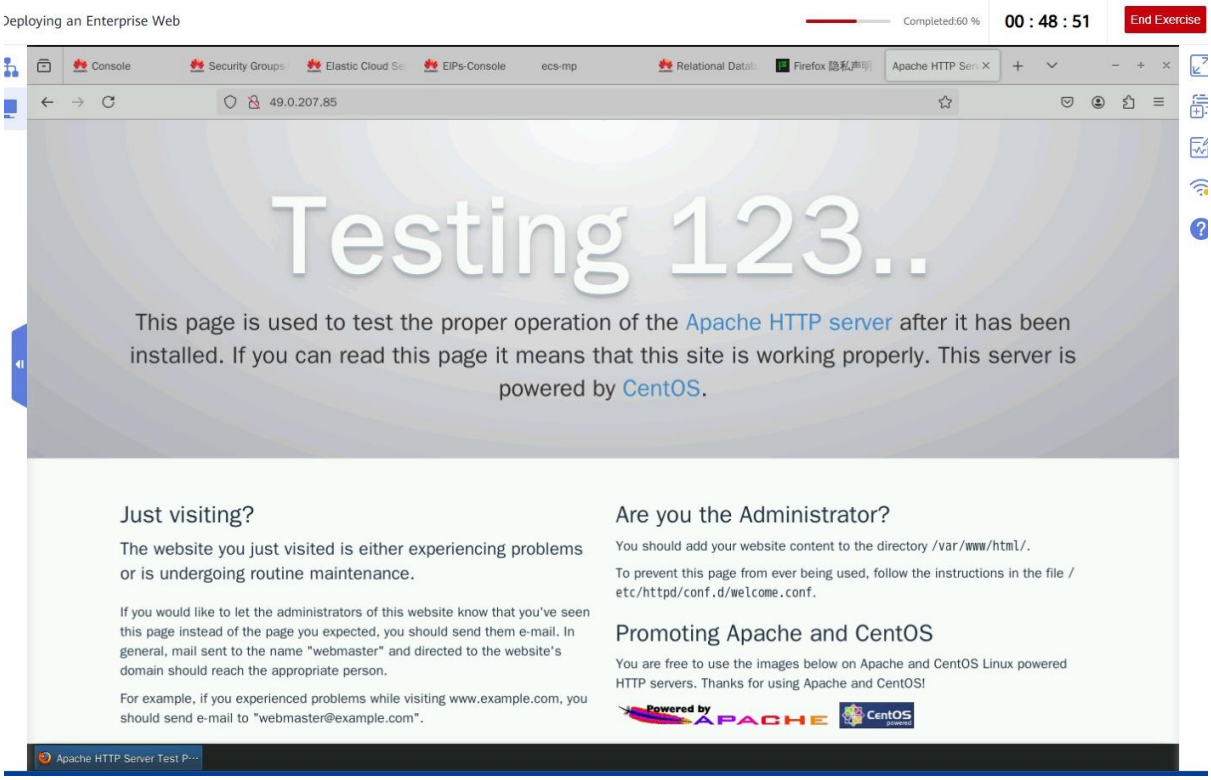
Security Groups Configuration

Here, you can see the security group rules allowing traffic on port 22 (SSH), 80 (HTTP), and 3306 (MySQL).



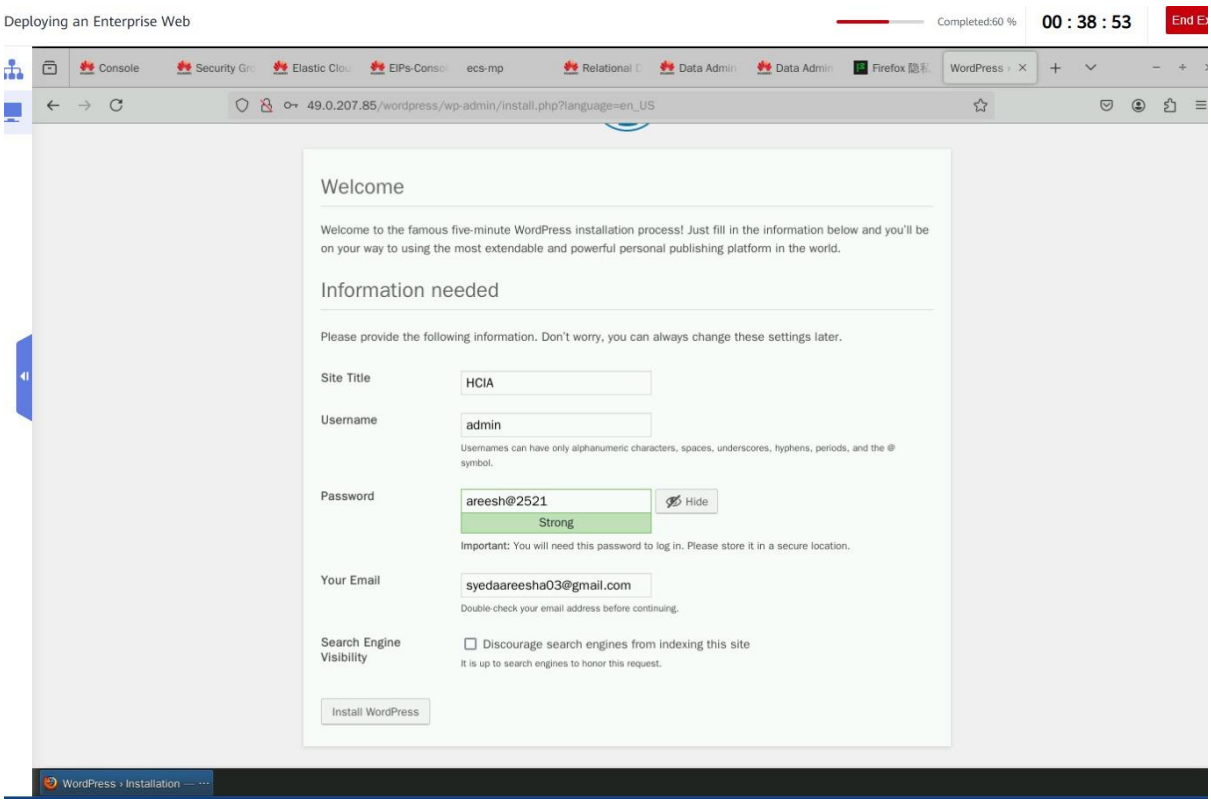
Apache Installed on ECS

Screenshot of ECS terminal where Apache web server was installed using command-line tools (`apt install apache2`).



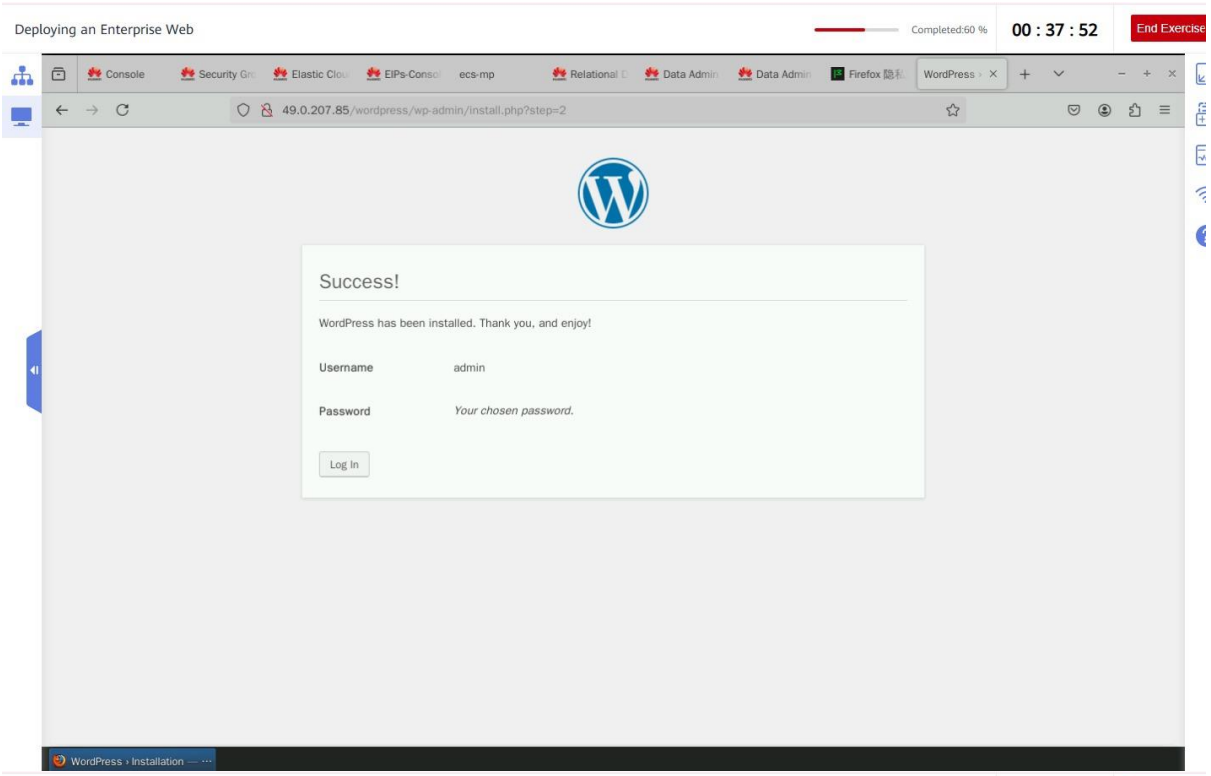
: WordPress Database Configuration

A screenshot of the form where database name, user, password, and RDS endpoint were entered to connect WordPress with RDS MySQL.



WordPress Homepage After Installation

This shows the default WordPress homepage after successful installation and login, proving that ECS + RDS configuration worked.



Deploying an Enterprise Web
Completed:60 %
